**VII. Read the following passage and indicate the correct answer to each of the following questions.**

While smaller schools class sizes are always desired, technology can not do that physically. However, technology can be a "force multiplier" for the teacher. Instead of the teacher being the only source of help in a classroom, students can access web sites, online tutorials, and more to assist them. Education doesn't stop at the end of the school day because students have access to teachers, resources, and assignments via the web and access these resources at any time. Students can also get help and tutoring at any time, whether from the teacher via email or online collaboration, or from a help web site.

Parental involvement is another factor that can increase student achievement. Most parents these days have extremely busy schedules, work different hours, and can't always help their child with homework or come to school for conferences. Technology can help. Parents can go to a class website and see what their child is working on, they can contact teachers via email and web sites, and they can even check their child's attendance and grades through online systems. They can also talk to their children from work via email and instant messaging.
