Online shopping

My name is Sara, and I love shopping online. I prefer mobile phone apps, but sometimes I use my computer. The phone is more convenient for me, and I can even do my shopping from bed! I love shopping so much that I buy everything I need at home. I get food, electronics, books, and even large pieces of furniture like my sofa and bookshelves all online! But I still prefer getting clothes from a store so I can try them on to be sure they fit me fine.

Yesterday, I bought a birthday present for my mother, and it arrived today! That saves me a lot of time. I am a very busy person, and I am a little forgetful too. If I think of something I need, then it is wonderful that I can buy it at that moment.

My friends aren't as comfortable with buying things online as I am because they think that it can be dangerous. Of course, bad things sometimes happen, but I am very careful with all of my personal details. I think the biggest fear that people have with using their credit cards online is that someone will steal their number. It is important to be sure that the web page is secure. You can see this if the address has got an "s" in it, like <https://>. That "s" means it is safe.

The South American Amazon Rainforest is often called the botanical lungs of the planet. Covering more than five-and-a-half million square kilometres, **it** additionally provides a natural habitat for over half of the Earth's most significant species of plants and animals in an area that is a little larger than half of the world's remaining rainforest.

Unfortunately, over the last four decades, this huge lush expanse has been ever more endangered by deforestation. During the 1960s and up to the 1990s, thousands of trees were **felled**, but what farmers did not realise is that the topsoil, when denuded of trees, is only considered cultivable for a short period of time.

This means the farmers have to clear more and more land to continue running a profitable and productive business. Despite the reduction in the number of trees being felled, the forest is still slowly disappearing, diminishing the biodiversity of the area and having a terrible global impact, as **fewer trees** means it has less capacity to clean the air we breathe.
