American Online is one of the big names on the Internet, and unlikely many other digital companies, it actually makes a profit. But the company which its rivals call the “Cyber- cockroach” was launched only in 1992. Before that **it** was a small firm called control Video Corporation, and it made video games. Then Steve Case, a former Pizza Hut marketing executive arrived and took the company online, innovative, fast moving, and user- friendly, American Online appeals to people who want to surf the Internet, but who do not have a lot of experience. For the same reason “**teachies**”, people who think they are more expert with computers, look down on American Online and its users. Recently, American Online (or AOL, as it calls itself) joined with Time Warner- a multi- million- dollar movie and magazine company- to create a multimedia giant.

Now, AOL has begun to expand abroad. In many Europe countries, including the United Kingdom, it is hard to buy a computer magazine that does not have a free AOL introductory offer. The company also puts advertisements onto the television, and employs people to hand out its free introductory disks at places like train stations. As the Internet gets faster AOL is changing. With many homes getting high- speed connections through fiber optic cables or the new ADSL technology, the “Cyber- cockroach” will have to show that, like real cockroaches, it can survive in almost any environment.
